

Ernest "E.J." Jones

Meet the Candidates, Week 9: How did you vote on proposition E? What are the best and worst elements of this proposition?

I voted **No on Prop E** in the March Election. In my opinion, Prop E tackled 3 issues, government surveillance, police pursuit, and police accountability.

I support the use of technology and I support the use of drones, however it is important that there is a community process when new technology is proposed.

Police pursuits are inherently dangerous. Our officers use their experience and judgment to make decisions around chases. I have a trust for our department, however I believe the laws that were on the books were sufficient and aligned with national standards.

Police accountability is essential to building a healthy relationship between our officers and community. I believe SFPD has worked hard to achieve all of the Federal DOJ requirements and would not want to undermine the commitments that have been made to reform.
