District 11 Meet the Candidate Week 13: How will you reach the Asian community in District 11?

I am committed to **addressing the varied needs** of the Asian community in District 11 and making sure that all voices are heard and represented.

As a fully bilingual and bi-literate Cantonese and Mandarin speaker, I know the Asian community is not monolithic. It comprises many distinct cultures, languages, and experiences. Recognizing this **diversity** is crucial to effectively reach and meet the needs of the Asian community in District 11.

I will **work closely with established community groups** to ensure that my efforts are culturally sensitive and effectively targeted. I would work with them to **establish and strengthen programs**, including those targeting seniors, small businesses, and youth and have regular town halls meetings and forums to maintain open lines of communication.
