

Jen Nossokoff

Meet the candidates, week 19: “Do you support permanently banning cars on the Great Highway?”

Yes, I **fully support** converting the Great Highway into a permanent oceanfront park. Transforming this failing roadway into a community-friendly park offers benefits like enhanced recreational spaces, boosted local tourism, and a stronger sense of community.

Frequent sand accumulation makes it unreliable for vehicular traffic, highlighting the need for a sustainable alternative. This change can help manage stormwater and reduce flooding through natural sand filtration. Our coastline is perfect for parks, demonstrated by the success of the Presidio Tunnel Tops and China Beach projects, which uplift community spirit and enhance environmental stewardship. Efficiently redirecting traffic via Sunset Boulevard will ensure smooth commutes while creating a dynamic public space.

Here is a piece I wrote for the neighborhood paper about my support of the permanent oceanfront park: [Reimagining The Great Highway: A Park for the People](#)
