

Adlah Chisti

District 11 Meet the Candidate Week 15: Where do you stand on the CCSF bike lane controversy? Do you support the bike lane or not, and why?

Support and need to examine the unintended consequences. As such **we should revisit the impacts of the protected bike lanes** on the community and CCSF enrollment and student culture. In a year we should have proposed project alternatives for public review and commenting, and update the bike lanes as appropriate for both District 11 and District 7 with the input of community members.

It's important to consider that CCSF is located in District 7, but many of its students are working-class individuals from District 11 who have specific transportation needs including parking. District 11 residents often juggle multiple jobs, are lifelong learners, seniors and adults that bring their children to campus. Personally, I have walked to take the 43 bus line in front of CCSF on Frida Kahlo many times. I have also parked on Frida Kahlo to attend classes at CCSF as well. My parents also brought me to their CCSF classes when I was a child, which inspired my academic achievements.

I will always support continuous and safe bike paths for both enjoyment and commuting, as well as the efforts of the Bike Coalition for working with seniors, families and children.
