

Jen Nossokoff

Meet the candidates, week 23: “Do you support the Geary/19th Subway?”

I strongly support the Geary/19th Subway Project. Investing in public transit is a smart, efficient, and responsible choice for our community. A world-class subway in our neighborhood will benefit small businesses by increasing access and foot traffic. It will reduce traffic congestion and parking demands while lowering emissions for cleaner air and better public health. Moreover, it will enhance mobility for the elderly, disabled, low-income individuals, and those without driver's licenses. And while strategic long-term planning is a crucial component of a holistic transit plan, it must be combined with fast, cost-effective measures that promote commuting by bus, biking, or walking to achieve a more immediate, sustainable, efficient, and accessible transit system for everyone.
