

Michael Lai

District 11 Meet the Candidate Week 18: Name one specific transit shortcoming in District 11 and tell us how you would change that as supervisor?

First, we need to **increase the speed, reliability, and safety of buses and trains**: the speed of **the 29**, which takes so many kids to and from school; on-time arrivals for **the 44**; and making sure **the J**, which often does not come once every 15 minutes, is reliable.

Second, we need **better pedestrian safety, especially in car busy areas** like San Jose, Geneva, and Brotherhood Way. We have not moved quickly enough — and done enough — to implement **better lighting, curb extensions, and automated speed cameras** ensure the safety of children, family, and elders in District 11.

Finally, certain areas of the district, such as Crocker Amazon, Outer Mission, and parts of OMI, need **more access to public transit**.
