Despite historically large budgets to tackle homelessness, San Franciscans continue to die as a result of our failed harm reduction, housing-first policies around homelessness and the related issues of addiction and mental health.

Per the County Medical Examiner’s Accidental Overdose reports, between 2022 and 2024, there were 278 overdose deaths in the 94102 zip code alone — eclipsing the 250-person reduction in the district’s unhoused population highlighted by the recent point in time report.

We need results. As Supervisor, I will:

- establish performance metrics and outcomes for nonprofits addressing homelessness; we must ensure we are investing taxpayer dollars effectively in light of our projected $800 million deficit next year. We will divest from those organizations contributing to non-profit waste, and double-down on those who are quantitatively effective at delivering outcomes.
- support referring undocumented, convicted drug dealers to ICE. Poisoning our most vulnerable residents is heinous — and demeans our sanctuary city status.
- advocate for one of three options for those living on our streets: shelter, treatment, or jail. And I will advocate for conservatorships where necessary to renew our commitment to public safety.
