

## Wendy Ha Chau

Meet the Candidates, week 31: **Do you support Sen. Scott Wiener's AI safety bill? Why or why not?**

**I do not support Weiner's bill.**

It is complete garbage in an attempt to hide the real motives of the potential shake down a government entity can pull on any AI company who lacks legal representation to fight this unconstitutional bill.

The same way, Aaron Peskin (who endorsed some of my challengers) controls the water rights (hurting the Native American peoples) on the Truckee River, Pyramid Lake and Summit Lake, Weiner wants to hold AI companies hostage by potentially making claims the energy usage is somehow a WMD or will create mass amounts of deaths...when it is all fake.

The below link shows context on how and why Peskin owns the Truckee River via his non-profit.

<https://projects.propublica.org/nonprofits/organizations/860851827/202401419349301415/full>

This bill is a variation of the unconstitutional housing permitting laws in CA. Please read *Sheetz V El Dorado* for more context (A SCOTUS 9-0 decision against California)." SCOTUS found California guilty of making false claims on people who want to build a house but denied or make it way more expensive in the name of "protecting the environment".

These politicians are corrupt to the core and need to be voted out.

If Weiner was not attempting to shake down AI companies, he would introduce a bill to recycle plastic waste or introduce a bill to ban High Fructose Corn Syrup from all foods sold in California.

But instead he is choosing to go after a bunch of tech n\*\*\*\* who don't know how to fight back.
