

“Our office is closely monitoring the 16th Street BART Plaza and the surrounding streets on a daily basis. The current law enforcement-led activation is clearly not a long-term or sufficient solution, and we are actively working to put forward a proven strategy to address the drug crisis, a budget proposal for the 16th street area, as well as major reforms to the vending system to promote safety and a vibrant neighborhood. There is no one solution to addressing street conditions, and 90 days into our term, we remain focused on working across departments to deliver true, long-term progress.”
