

Albert Chow

If you were supervisor, would you do anything to help move the project forward? If so, what specific actions would you take? If not, why not?

My family moved from Chinatown to the Sunset in 1978 when we needed more space. Growing up here, I value the light and space that comes with a neighborhood that is not defined by high rises.

While I accept that we need to accommodate growth, I don't believe the best path is allowing buildings of the height and mass of the 1234 Great Highway proposal which assaults the character of the neighborhood we are passionate about maintaining.

We can accomplish the same goals by incentivizing ADUs and building on sites farther from the ocean where the height would not dramatically impact the nature of the neighborhood.
